Hadley Reis
Cloud Enginner

// Experience

2022-	**StoryTeq / TeamITG**	Cloud Infrastructure Engineer

Remote working engineer, working on solo and team projects such as, migration from AWS to GCP, deploying and maintaining services in Kubernetes (GKE) clusters using Octopus Deploy and GitLab CI/CD pipelines. Also looking after BAU tickets, with tasks involving Linux, Windows & Mac systems administration, and VMWare.

2021-2022	**OceanWeb Limited**	Technical Support Engineer

Looking after the satellite and cellular communications, internal IT and systems of high-net worth clients / super-yachts. This involved both remote support and pro-active monitoring of systems, along with travel to the vessels to install hardware and perform maintenance of devices such as network hardware, Server infrastructure, end-user devices and Sat-comms (VSAT, Iridium, Inmarsat-C etc.). I also performed side projects including Python coding and running customer websites on AWS.

2017-2021	**Autofutura**	IT Engineer

Running projects such as implementing AWS deployments, with an aim to achieve IaC (using Terraform and Ansible), along with installation of physical data centre environments utilizing experience of HP iLO and Dell iDRAC systems. I also implemented a browser based "Remote Desktop" solution to allow securely "locked-down" clients to safely utilise desktop software as a hosted SaaS solution.

// Education

2013-2015	**Aerospace Engineering**	Fareham College / CEMAST
2009-2011	**Mechanical Engineering**	Isle of Wight College

Hadley Reis
Cloud Enginner

// About Me

I am an adaptable and responsible engineer with a history of finding out of the box solutions.

Througout my life I have had the opportunity to live in a wide rage of locations, including Australia and the Mid-West of America.

These experiences have given me the chance to associate with a wide range of cultures and beliefs that I feel have substantially broadened my horizons.

I have a keen interest in anything technical, having gained knowledge in a wide variety of subjects, including Computers and Networking, Marine Technologies and Boating and Aviation/Aircraft.

Interests
Airsofting
Shooting
Motor-Sport
Cars/Motorcycles
Aviation
Boating
Computer Gaming

// Other Qualifications

2016   **Safe Use of Ladders and Harnesses**
National Plant Operators Registration Scheme

2009   **RYA PowerBoat Level 2**
Royal Yacht Association

// Professional Statement

Technical Engineer with experience in both Windows and Linux environments. Currently in a remote working role looking after cloud based systems, predominantly in GCP. Also using CI/CD pipelines in both GitLab and GitHub (GitHub Actions).

Experienced with physical server hardware from HP, Dell and SuperMicro, having installed and maintained these sytems in datacentre and marine environments. Also experienced with virtual environments, either in the cloud (AWS and GCP) or on-prem using Citrix XenServer (XCP-ng) or VMWare.

Background in ISP computer networking and systems adminstration in both the Financial and Marine sectors.

Developed an Android App to enable reception of Sports TV on mobile devices without overloading WiFi systems at venues, utilising DVB technology.
